## About the Cover

**KAUGMARAN** (*n*) Cebuano-Bisaya term  
for development

Paulino Molit was once an Agricultural Technologist (AT) of LGU-Catmon, Cebu for nearly 7 years (2008-2015) where he had his first encounter with e-learning. He is at present an AEW of OPA-Province of Cebu.

## Republic Act 10601 AFMECH Law

Agricultural and fisheries mechanization refers to the development, adoption, assembly, manufacture and application of appropriate, location specific and cost-effective agricultural and fisheries machinery using human, animal, mechanical, electrical, renewable and other non-conventional sources of energy for agricultural production and post-harvest/postproduction operations consistent with agronomic conditions and for efficient and economic farm and fishery management towards modernization of agriculture and fisheries (Section 3.b).[4]

RA 10601 covers research, development, and extension (RDE), promotion, distribution, supply, assembling, manufacturing, regulation, use, operation, maintenance and project implementation of agricultural and fisheries machinery and equipment (Section 4).

# Regional center holds 2-day target setting

by DR. MERRIAN PIQUERO SOLIVA

The Agricultural Training Institute-Regional Training Center 7 in Central Visayas geared up for their 2017 with a two-day activity which aimed to imprint the commitment of ATI extension practitioners and professionals in creating a positive impact on the lives of the farming communities at Kew Hotel, Tagbilaran City on January 5-6, 2017.

The activities included were the presentation of 2017 training concerns; coming up with the final tasking of activities; and the innovative strategies per section; awarding of performing staff; rating of the 2016 Second

Semester Individual Performance Commitment and Review (IPCR) and coming up with the First Semester 2017 IPCR.

The quotation of Earl Nightingale, American radio personality, writer, speaker, and author that goes: *“Success is the progressive realization of a worthy goal or ideal”* is the guiding mantra among staff, thus, they agreed to start 2017 right.

Moreover, a Holy Mass was officiated by Rev. Fr. Lito Geangan for spiritual enlightenment.

The men and women behind the accomplishments of ATI in Central Visayas during the target setting held at Kew Hotel, Tagbilaran City on January 5-6, 2017.

# The e-package that Paul Molit calls it

by DR. MERRIAN PIQUERO SOLIVA

The motivation of pursuing advance studies is the key that unlocks his way towards e-learning journey.

Through the power of Information, Communication and Technology (ICT) and the persistence to look for scholarship opportunity led his way to the e-extension portal.

Paulino Rule Molit, an agricultural extension worker of the Office of the Provincial Agriculturist, Province of Cebu is just like a typical guy who uses and/or maximizes ICT in searching websites for possible opportunities. Mr. Molit was once connected at the Local Government Unit of Catmon, Province of Cebu as Agricultural Technologist for nearly 7 years from October 16, 2008 to July 13, 2015 where he had his first encounter with e-learning.

### unlocking e-learning

From the numerous websites that he had visited; the electronic extension of the Department of Agriculture through its lead agency, the Agricultural Training Institute (ATI) captivated his curiosity.

Though the e-extension program site did not technically provided his first-hand motive, yet, he was glued on it, and that's way back 2010, barely three (3) years in its operation from launching

in December 2007 whereby ATI was mandated through Department Order No. 03, Series of 2007 as the lead agency for the provision of e-extension services in collaboration with the various agencies, bureaus and organizational units of DA. This is to integrate and harmonize ICT-based extension delivery system for agriculture and forestry.

The first e-course that Mr. Molit enrolled was the Organic Agriculture for Sustainable Agriculture in time for the approval of Republic Act 10068 otherwise known as the Organic Act of 2010.

His work include field-monitoring; provide technical assistance to farmers; conducts training and extension and so with other functions/tasks as directed by the Municipal Agriculture Officer and its Local Chief Executive of their town.

## e-learning impetus: from 1 to 15 and counting

Mr. Molit identified three (3) reasons why e-learning had provided great impetus to him as an extension worker. First, he wanted to level-up his educational background though he already had 30 units in Master in Public Administration; second, he needed to equip himself technically in all capacities including crops; livestock and poultry; fisheries; sustainable agriculture and social technology; and finally, the certificates wherein all online courses offered had.

He is indeed a manifestation of a learner that strives to add a feather in his cap and accolade to his wall because from Organic Agriculture for Sustainable Agriculture course; he was able to finish another 15 online courses from January 2011 to August of 2014 namely: Yummy Yam: Ubi Production; Walang Aray sa AI; Artificial Insemination in Pigs; Changing People's Lives through Effective Extension Delivery; From Seed to Seed; Corn Production; Go Mango Hit the Jackpot; Citrus Production; Straw Mushroom Growing: A viable Agri-Enterprise; Alternative Pest Management; Jackfruit Production; Grant to Proposal

Writing; Community Organizing; Growing Vanda and Vandaceous Orchids; Production of High Value Crops in Greenhouse; Basic Agricultural Marketing and Extension and Training Management.

## his so-called gains

When Mr. Molit was asked how the e-courses have helped him as an employee, as an agricultural extension worker and as a person as he is. He passionately answered as quoted: "As an employee, these e-courses have helped me a lot, because these really brought and gave me confidence in my daily activities and in my working environment. Considering that there are e-courses that enhanced my capacities both in office, technology support/assistance and in extension works, respectively.

One concrete example is the e-course on proposal writing, wherein it helped me a lot and served as one of my reference when I was crafting / consolidating a project proposal worth 3.9 Million,

and from that learning, it was luckily approved and the funds are already downloaded to the Local Government Unit of Catmon, respectively. Another, e-course is on Extension Delivery System wherein it facilitated me in dealing with people in the field having their respective differences. However, it is then making me confident to face those stakeholders who talked/asked me with some agriculture related technology.

Being a neophyte in the field of agriculture, the said e-courses that I took really contributed in molding me as a reliable and effective agriculturist; further, it equipped me with knowledge which are very vital as an agriculture extension worker and a government employee as a whole.”

He further emphasized that he will continue to enroll and finish all the online courses offered by ATI because he learned a lot besides the knowledge and the certificates he got, provided a huge merit on his transfer from LGU-Catmon to OPA-Cebu; thus, he truly believe that it's the best supplement in enhancing his technical expertise and know-how in the field of agriculture.

### **boundless words for ATI**

Mr. Molit gestured with two (2) thumbs up and praising ATI for a job well done. He said: “ATI really find the best if not the very best alternative in providing the extension workers with competent knowledge in a very minimal to no cost acquiring and or learning process.

Very minimal cost in a sense considering that only internet charge will apply to those e-learners who do not have access to free internet connection.”

However, the e-learning site is also a big door of opportunity to farmers, fishers, livestock raisers and other stakeholders who are able and willing to learn.

Moreover, e-learning courses designed and offered online is a noble project of ATI in which it provided knowledge on agricultural production

technology to the extension workers and farming sectors in an easy, cost and hassle free and most of all not time-bound learning process. And indeed this will truly support the agricultural development in our country.

Therefore, Mr. Molit look forward that ATI will offer more reliable and research based online e-courses for e-learners be it an extension workers, farming sectors and other stakeholders whose concerns are in agricultural productivity, in order to learn more technologies for agriculture-livestock and fishery development including that of personal capability enhancement.

### **and the total e-package**

Paulino Molit defines his total e-package by sharing these words that will surely ignite encouragement among his co-learners: “My capabilities as a person or

as an employee have apparent difference before and after I took the e-courses.

Before, I felt confused being an employee rendering extension works because I have a limited background/knowledge on some research based technology. Specifically, when there were clients who consulted for some specific technologies. However after taking the said e-courses, it really augmented my confidence as an extension worker because I can assist their needs whenever there are questions relating to technologies, and from the e-courses that I have studied, respectively.

Furthermore, I have also a good reference that can be used distinctively when I am conducting lecture during trainings or seminars. Sometimes, when I forgot specific details of a certain technology, I have an immediate reliable reference which can be browsed directly, and that's the e-courses at my account at the e-learning sites.

In all, the e-learning courses of ATI really took part of my personal, social and career development as an agriculturist, extension worker and an employee, thereof.”

Thus, the so-called e-package that he defined.

“  
**ATI really find the best if not the very best alternative in providing the extension workers with competent knowledge in a very minimal to no cost acquiring and or learning process.**  
”

# ATI-EP Learners join 1st ALS Community Caravan

by MA. PAMELA N. RESPECIA

The 1st ALS Community Caravan kicked off with a marching band in colourful banners. Joining in were more than a hundred of individuals composed of Alternative Learning System (ALS) learners, teachers, LGUs, and other stakeholders. The event was held on January 13, 2017 at Baclayon Covered Court, Baclayon, Bohol.

Distinguished guests present during the activity were: Bohol Governor Edgardo M. Chatto; Dr. Casiana P. Caberte, Chief CID-Bohol Division; Dr. Wilfreda D. Bongalos, Superintendent, Bohol Division; and Dr. Carolyn May O. Daquio, Training Center Superintendent II, ATI-7.

One of the highlights of the event is the sharing of ALS successful stories. Mr. Mario Lumaad's story stood out among others. He was 43 years old and an elementary graduate, who did not lose hope in achieving higher education. He enrolled in ALS Program and successfully passed the assessment tests and was able to proceed to a four-year Bachelor Course in Education. At 48, he is now teaching at Bohol North Western College, Catigbian, Bohol. Truly an inspiration to all ALS learners.

Participants and Guests during the 1st ALS Caravan at Baclayon, Bohol.

ATI-EP Scholars of ATI 7 was joined by Dr. Carolyn May O. Daquio (in brown blouse) and ALS Teachers during the caravan

Also participated in the said activity, the twenty (20) ATI-EP learners of ATI-Region 7. These learners are at their elementary and highschool level ages 14-21, who want to pursue college degree. The implementation of ATI-EP in Region 7 is in partnership with the DepEd ALS, knowing that ALS program principles suit the needs of these OSYs/ ATI-EP Learners.

The Academic and Technology Integration-Education Program (ATI-EP) is an education and training intervention of ATI in support to the Youth Empowerment through a sustainable (YES) Program for the 4H clubs in the Philippines, preparing the youth as a new breed of competent farmers of the new generation.

**“TRAINING IS A RE-ENERGIZING  
PROCESS OF SELF-RENEWAL.”**

# ATI7 joins 17th Ubi Festival

by DR. MERRIAN PIQUERO SOLIVA

**T**AGBILARAN CITY. – As an active partner in the province’s initiatives, the Agricultural Training Institute-Regional Training Center 7 based in Cabawan District, this city joined the four-day annual celebration of the Ubi Festival, now on its 17th year last January 20-23, 2017.

Bearing this year’s theme: *“Ubing Bol-anon Dugang Palambo-on: Mga batan-on ang Pagpananom Buhaton,”* (Younger generation are urged to plant the crop in support for the continuous effort of expanding Bohol’s Ubi Industry) the launching of the International Sustainable Tourism Year 2017 was made which was spearheaded by Bohol Governor Edgar M. Chatto together with DOT Regional Director 7, Catalino E. Chan III and other key personnel in the province.

ATI-RTC 7 meanwhile, being a dynamic collaborator agency graced the launching. Representing Training Center Superintendent II; Dr. Carolyn May O. Daquio was Dr. Gracia Arado, TCS I/Officer-in-Charge.

Gov. Chatto challenged the Boholano ubi growers to produce more especially the kinampay because of its unique aromatic characteristic.

Besides, it is the symbol of the province wherein Boholanos considered the crop as sacred and is being venerated.

Meanwhile, Dir. Chan expressed his all-out support for Ubi, thus in time for the declaration of the International Tourism Year, he encouraged everyone to support and make Ubi Festival as grand as other festivals celebrated in the country.

# AFMECH Law Consultation hosted by ATI 7

by REYNADEZ M. LIM

**T**agbilaran City, Bohol. As the need for agri-fisheries mechanization is arising, the Agricultural Training Institute found the necessity to conduct Agriculture and Fisheries Mechanization Law Consultation. This is to increase awareness and gather consultative solutions to existing issues on farm operations to become easier and more productive.

Last February 22, 2017, ATI RTC7 headed by Dr. Carolyn May O. Daquio, ATI 7 Training Center Superintendent II with its project officer, Engr. Rizaldy Mercadal, ATI 7 Agriculturist II, held the said consultation together with concerned LGUs, government agencies and SUCs at Panda Tea Garden, Dao District, Tagbilaran City, Bohol. It was attended by 46 agricultural engineers, professors and farm operators combined.

Discussion on what is AFMECH law all about, different crop processing innovations and its relation to soil and water conservation are the highlights for this one-day event. Before it ended, attendees came with lists of issues and probable solutions to promote and implement AFMECH Law in the province of Bohol.

Agricultural Engineers, professors and farm operators from the province of Bohol actively participated during the one-day briefing on AFMECH Law at Panda Tea Garden, Tagbilaran on February 22, 2017

# Seven personnel receive loyalty awards during ATI @ 30

by DR. MERRIAN PIQUERO SOLIVA

(STANDING FROM L-R): Artemia S. Albores, Esmailita P. Romero, Ulysses U. Alesna, Alberto J. Lerion, Ma. Erma F. Lucero, and Carmela A. Secuya (SEATED FROM L-R): ATI Director, Dr. Luz A. Taposok, ATI Deputy Director Alfredo S. Aton and ATI7 TCS II, Dr. Carolyn May O. Daquio

The Agricultural Training Institute (ATI) marked its three decades of “Extending Excellent Extension Services beyond Boundaries” dubbed as ATI @ 30. The celebration was held at ATI Compound along Elliptical Road, Diliman, Quezon City last January 23-27, 2017.

The week-long activity showcased a wide array of products, services and innovations from the individuals and organizations assisted in the regions through ATI’s Network of Training Centers through booth display at ATI’s lobby.

Moreover, part of the highlights include the signing of the respective center’s commitment and the awarding of personnel who have been loyal to the government service and the institute for 20 to 40 years of active service.

The ATI-RTC 7 in Central Visayas has seven (7) personnel as this year’s loyalty awardees. They are: Carmela A. Secuya, Training Specialist III and Ma. Erma F. Lucero, Information Officer III, who served 35 years in service; Esmailita P. Romero, Administrative Officer IV, Aurelio L. Timtim, Training Specialist II, Artemia S. Albores, Administrative Aide VI and Alberto J. Lerion, Security Guard I; who served 30 years and Ulysses U. Alesna, Administrative Aide I, with 20 years in service.

## RAFEN-7 in pushing forward the integral training and extension plans for 2017

by MA. PAMELA N. RESPECIA

Coming up with an organized, harmonized, and effective extension delivery system has been a challenging task for Region-7.

ATI has collaboratively been working with the prime movers of the agricultural development in our region especially in pushing forward the integral extension plans.

Thus, the 1st Quarterly Meeting of the Regional Agriculture and Fishery Extension Network (RAFEN)-7 was held on February 23, 2016 at the Civil Service Regional Office-7, Sudlon, Lahug, Cebu City.

Highlights of the said activity include the presentation of 2017 lined-up training & extension activities per agency; and the signing of the Memorandum of Understanding (MOU).

The signing of Memorandum of Agreement with the partner NGAs, SUCs and Private stakeholders

# Active women partners in Region 7 join 2017 NATIONAL WOMEN'S MONTH

by REYNADEZ M. LIM

ATI Director, Dr. Luz A. Taposok (second from Left) is flanked by Region 7 delegates composed of (L-R) Ma. Gracia S. Pungay, Judith Yap, Irene Ordinario, Florenda Villamor and Reynadez Lim

**C**elebrating with the whole nation for the 2017 National Women's Month, the Agricultural Training Institute Central Office in Quezon City organized a 3-day activity entitled "Symposium of Women in Farming" with the theme "Honouring the Trailblazing Women in Agricultural Enterprise" last March 1-3, 2017 at ATI Building, Elliptical Rd., Diliman, Quezon City.

Highlights of the event were display of products from different regions, break-out sessions of different agri-processing technology and an educational journey to the farm of the "Seedling Queen in Luzon" Duran Farm, Bulacan.

Participants enjoyed every activity and were optimistic that the learnings they have will be applied to their respective farms and businesses.

Women from Luzon, Visayas and Mindanao who excelled in farming and agri-business participated in the said symposium. Participants from Region VII were, Mrs. Irene Ordinario of Antequera, Bohol, Mrs. Florenda Villamor of Alegria, Cebu and Mrs. Judith Yap of Lazi, Siquijor, with ATI-RTC 7 gender and development focal and alternate focal person Ms. Ma. Gracia Soliva-Pungay and Reynadez M. Lim joined the delegation.

These women brought with them their products including potted herbs and spices, malunggay and turmeric tea and powder, banana chips, squash noodles and many more.

Walk-in customers and staff of nearby offices dropped by and enjoyed the variance of healthy and affordable products of hardworking Rural Improvement Clubs women from all over the country.

## RAFEN 7 .....p9

The MOU is between the Agricultural Training Institute (ATI) and the local partners in Region 7: the Local Government Units (LGUs); the Department of Agriculture (DA) and attached agencies; State Universities and Colleges (SUCs); National Government Agencies (NGAs), Non-Government Organizations (NGOs) and Private Sectors. Each of these groups indicated their willingness to work with the ATI to address the unique and varied concerns.

Meanwhile, among the twelve (12) partner agencies who presented their training and extension activities were; ATI-7 by Dr. Carolyn May O. Daquio; Phil-FIDA-7 by Director Benjamin S. Gomo; DAR-7 by Ferdinand Yu; DA-RFO 7 by Merylyn S. Talagon; DENR-7 by Sterremae L. Allego; NDA-7 by Monina Mangubat; PCIC-7 by Alberto Divinigraci; BFAR-7 by Edgar B. Delfin; FPA-7 by Noel Negre; CDA-7 by Mario Limbaga; Siquijor State College (SSC) by Dr. Expedita Duran and the Bohol Island State University (BISU) by Professor Marietta Macalolot.

Indeed, the presentations open up a lot of learnings and opportunities. It also became an avenue to materialize extension interventions and other extension-related services. Each agencies has prepared a unique strategies and innovations to address the challenge in strengthening the extension delivery system in the region.

# 25 AEWs in Central Visayas undergo research training

by DR. MERRIAN PIQUERO SOLIVA

In response to the need in conducting research and extension, 25 agricultural extension workers from the provinces of Siquijor and Bohol attended the three-day Capability Enhancement Training on Data Gathering, Analysis, Interpretation and Report Writing on March 22-24, 2017 at BPSTEA Conference Hall, Tamblot Street, Tagbilaran City conducted by the Agricultural Training Institute-Regional Training Center 7.

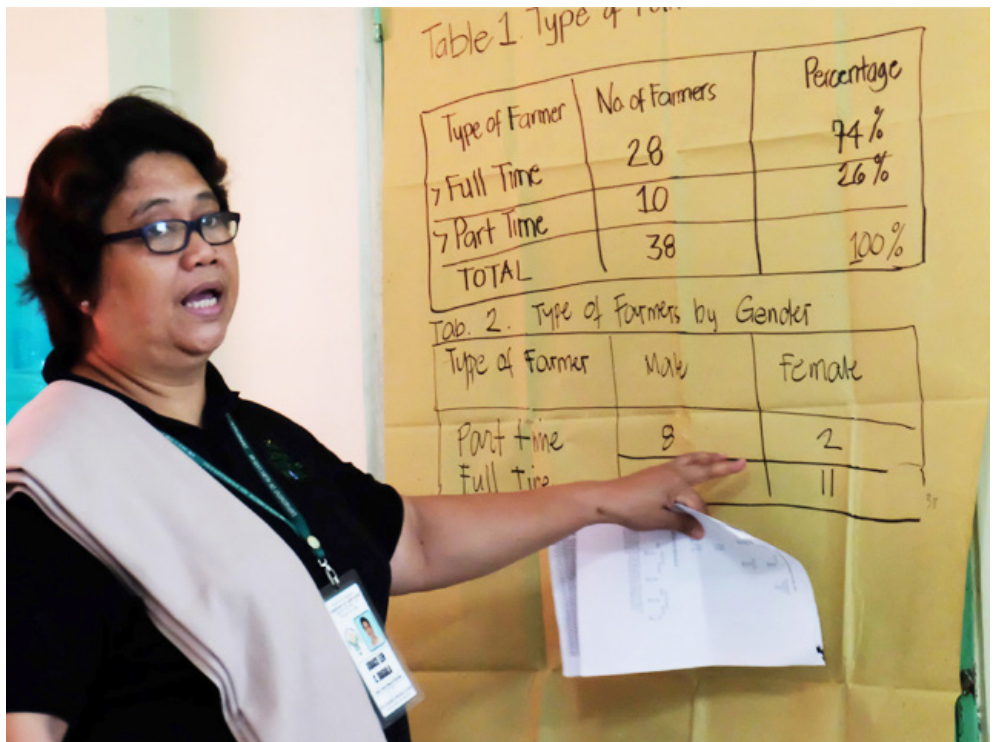

This training was the product of the consultation between members of the Regional Agriculture and Fishery Extension Network (RAFEN) in Central Visayas wherein a capability enhancement on research and extension is necessary among AEWs who are no longer doing hands-on research.

The lecture and guided workshop provided the participants the appreciation of the activity. They believed that through constant exercise and actual practice will enable to hone their research skills.

The pool of facilitators were Grace Len C. Dagala, Senior Science Research Specialist, Research Division, Department of Agriculture-Regional Field Office 7 and Dr. Merrian Piquero Soliva, Media Production Specialist of ATI-RTC 7.

During one of the many guided workshops where participants showed so much interest in order to come up with a sound output

Grace Len C. Dagala, Senior Science Research Specialist of DA-RFO 7 was among the training facilitator

# FIRST

# e-Learning

## completion ceremony at NORSU

by DONALD TORRES, INSTRUCTOR, NORSU-PAMPLONA

The 1st ever e-Learning Completion Ceremony was successfully conducted by the College of Agriculture, Forestry and Fisheries in collaboration with the Agricultural Training Institute (ATI) – RTC 7 on March 28, 2017, 10:00 o'clock in the morning at NORSU Pamplona Campus, Pamplona, Negros Oriental. It aimed to complement the achievement of the students in their completion of the e-Learning modules related to their field of interest in agriculture, forestry and fisheries. The e-Learning is a major component of the Philippine's Department of Agriculture's e-Extension Program with ATI as the lead implementing agency. To continue realizing the vision, they collaborate with other government agencies, state universities and colleges and non-government organizations.

The program formally started with the warm words of welcome delivered by Dr. Merivic G. Catada, the dean of the College of Agriculture, Forestry and Fisheries. Having finished and promoted the knowledge, products and services offered under the e-Extension Program specifically in its e-learning component, Dr. Carolyn May O. Daquio, the center director of ATI – RTC 7, proudly led in the presentation, confirmation and awarding of certificates to 63 graduating students who have fully completed at least three (3) e-learning courses. She was ably assisted by Dr. Merrian Piquero Soliva, the e-Extension coordinator of ATI together with the dignitaries from NORSU and LGU Pamplona. Ms. Josie D. Raging, a Bachelor of Science in Agriculture major in Agronomy student was honored as the topnotcher of the batch for having completed 21 e-Learning modules.

Right after the awarding of certificates, Dr. Daquio gave a message which informed and further inspired the graduates to value the role of agricultural farm tourism in alleviating the living condition of

***Dr. Merivic G. Catada, the dean of the College of Agriculture, Forestry and Fisheries warmly welcomes the guests, visitors and graduates***

***Ms. Josie D. Raging, the topnotcher of the batch, smiles with confidence as she shakes hand with Dr. Limson, university president while TCS II Dr. Daquio of ATI-7 looks on***

*“The best fertilizer is the farmer’s footprints.”  
This is one of the quotable statements uttered by Dr. Daquio in  
her message addressed to the graduates*

the people, most especially the farmers. She stressed out that the best fertilizer is the farmer’s foot prints. Students were given additional knowledge about the importance of the latter in the speech of Dr. Virginia E. Lacuesta, the vice president for Research, Extension and International Linkages (REXIL). Gracing the occasion as the guest of honor and speaker was Engr. Ronald Roxas, the executive secretary of Mayor Janice V. Degamo of the Municipality of Pamplona. He expressed his warm congratulations to the graduates allowing them to realize the practical purpose of their chosen degrees as the answer to the uncertainties of today. As the program continued, the University President, Dr. Joel P. Limson, kept on encouraging his beloved students through his very surprising goal-centered message. He told everyone to keep on conducting researches that are technology-driven which could be practically utilized in community extension.

University President, Dr. Joel P. Limson, shares significant information about the changes of the college by next year which amaze the audience

Dr. Virginia E. Lacuesta, the vice president for Research, Extension and International Linkages (REXIL), emphasizes the role of Agroforestry in sustaining the economy

*“The best fertilizer is the  
farmer’s footprints.”*  
~Carolyn May O. Daquio~

Dr. Limson also challenged the students to convert their knowledge into profit where he emphatically furthered that there is money in agriculture. In his speech, he revealed that NORSU Pamplona would already be called as Technology Training and Development Center by next year and no longer a campus where state-of-the-art facilities and equipment are found. As the first part of the program ended, Prof. Alan E. Faburada extended his grateful acknowledgement to everyone who in one or the other made the momentous affair a successful and memorable one.

The activity resumed in the afternoon with Dr. Soliva discussing on the e-Learning online courses. She made emphasis on the various advantages of the programs offered. She as well gave instructions about the steps in the on-line registration and enrolment. Few students asked questions with regard to the difficulties they encountered during the process of signing in and in selecting the courses they have chosen. On a positive note, problems were entertained and explained well by Dr. Soliva which eventually enlightened the students' confusion. The short program culminated through Dr. Daquio's heartfelt words of

gratitude addressed to the CAFF Faculty and Staff, LGU Pamplona and to the students.

The whole day affair definitely made a difference to the lives of the graduates and to everyone who were blessed with the rare opportunity of being united with the country's top implementer of extension programs - ATI.
