FAITH Webinar reaps positive response among online learners

by MERRIAN PIQUERO SOLIVA, PHD

TAGBILARAN CITY - Due to the COVID-19 pandemic which resulted in the declaration of the Enhanced Community Quarantine starting March 16, 2020 to April 30, 2020, the Agricultural Training Institute-Regional Training Center 7 based in Cabawan District, this city re-aligned its extension delivery services to continuously serve clients across the region.

One of the modalities identified was the online learning through a WEBINAR on FAITH (Food Always in the Home) Gardening.

The webinar was done through a closed group via the center's official Facebook page and was implemented by a pool of staff that acted as administrators and resource speakers.

Since FAITH is a wide topic, the webinar was split into three (3) episodes and was aired on May 4, 7 and 21, 2020 respectively.

The first episode catered on the lecture-inputs by two (2) of the center's Agriculturists in the person of Joemelyn Allianic-Sumagang and Jeffrey O. Awas where they talked about the basics of FAITH, from steps 1 to 3 and steps 5 to 10 respectively, while Step 4 was done in Episode 2 by another licensed agriculturist, Arnel S. Navaro that focused on the demonstration of the fertilizer application and composting while Episode 3 talks about the Cultural Practices in the Garden with Joemelyn A. Sumagang and another licensed Agriculturist, Reynadez Lim-Curayag.

Nearly 250 participants joined the closed group webinar from the different parts of the country.

The webinar was successfully administered through the Information Services Section

WEBINAR 01 on FAITH Online Trainers are licensed agriculturists from the Agricultural Training Institute-Regional Training Center 7 (ATI-7). L-R: Joemelyn Allianic-Sumagang, Training Specialist I and High Value Commercial Crop Program Focal Person; Reynadez Lim-Curayag, Agriculturist I with Jeffrey O. Awas, Technical Support Staff at the same time Corn Focal Person with Arnel S. Navaro, Technical Support and RCEF Staff

(ISS) of ATI-7 together with the technical support from the Career Development and Management Services Section (CDMS) and the expertise of Technical Staff, Ma. Pamela N. Respecia and Network Controller, Rhea Kristine Q. Bongcac.

Online participants shared their positive thoughts to the webinar and they are grateful that ATI-7 initiated this activity because they wanted to know about the

timeline when to start planting new crops to ensure continuity of vegetables year-round. Episode 1 was very helpful with that. Episode 2 on basket fertilizers was also informative while Episode 3 sum it up.

Meanwhile, participants are also hopeful to learn about different composting methods that are applicable in a small garden/urban home settings and they are excited to learn more.

Grow My Own Food Project Kicks Off

by DORIS ISABEL J. RACHO

Ready-to-plant seedlings are due for distribution to participants to the Grow My Own Food (GMOF) Project. GMOF is one of the example of private-public partnership and collaboration during the pandemic which kicked off last May 26, 2020 at the Carlos P. Garcia Park, CPG North Avenue, Tagbilaran City, Bohol

Tagbilaran City – “I joined Grow My Own Food (GMOF) project to promote clean and green at this time of pandemic, we know that most vegetables today are commercially produced. I want to help promote clean and green, and produce organic vegetables in my backyard while on community quarantine” said Henry Cantoneros, a displaced worker from Maribojoc, Bohol during the launching of GMOF on May 26, 2020 at the Carlos P. Garcia Park, this city.

Grow My Own Food project is a backyard garden contest designed for the youth, displaced workers and their families, aiming to showcase their gardening skills and ability to grow their own food naturally and sustainably to combat against this crisis.

This collaborative effort is initiated by Origin Box, Dalareich, Kapunongan sa Bol-anong Organikong Mag-uuma (KBOOM), Bohol Association of Hotels, Resorts and Restaurants (BAHRR), and AGREA in partnership with the Provincial Government of Bohol through the Office of the Provincial Agriculturist (OPA) and the Agricultural Training Institute-VII (ATI-7).

Through its Plant Plant Plant Program, ATI-VII sponsored the participants with assorted seedlings, technoguides and vermicast, while the OPA gave away assorted seeds as the competitors’ starter kits for the contest.

A total of 50 participants coming from the 1st District of Bohol participated in the event and it ran from May 26 to July 25,

this year.

“We are happy to initiate this project together with our hardworking partners to help our fellow Boholanos in sustainable way especially this time of COVID-19 crisis. Grow My Own Food is one of the example of private-public partnership and collaboration during this difficult time. Through this contest, we can inspire more Boholanos to plant more and secure their own food at home. We can work as one community, one resilient Bohol” said Dalareich Polot one of the project initiators.

Top 3 winners received cash prizes from other sponsors with the amount of P5,000.00, P4,000.00 and P3,000.00 for the 1st, 2nd and 3rd prizes respectively

ATI-7 airs Radio Program on Urban Gardening

by MERRIAN PIQUERO SOLIVA, PHD

Farmcaster and Information Officer II of ATI-7, Mr. Jun Alguin B. Oliver anchored the ten-day, 30 minutes' radio program dubbed as "Takna sa Agrikultura" over station dyTR 1116 kHz AM, Tagbilaran City

TAGBILARAN CITY – A ten-day, 30 minutes' radio program dubbed as "Takna sa Agrikultura" aired over station dyTR 1116 kHz AM, in this city last April 27 to May 8, 2020.

This program is brought to you by the Agricultural Training Institute-Regional Training Center 7 (ATI-RTC 7) based in Cabawan District, Tagbilaran City with the objective of reaching a wide variety of audiences.

ATI-7 purposely ran this radio program with the hope of spreading

the basics in urban gardening to listeners of all ages and provide freebies such as garden tools, seedlings, and other exciting prizes that the audience can get especially during this time of COVID-19 pandemic.

As the community is still on enhanced quarantine, "Takna sa Agrikultura," radio program is identified as one of the many modalities of ATI-7 that their programs and services can be delivered to their clientele.

On its launching last April 27, 2020, at 3:00-3:30 P.M., the program will be aired until May 8, 2020, which is hosted by ATI-7's Information Officer and Farmcaster, Jun Alguin Oliver.

For those people who cannot access the frequency of the station, they still can hear it via ATI-7's official Facebook page at ATI in Central Visayas since each episode will be live streamed.

Assisting Mr. Oliver during the airing of "Takna sa Agrikultura" is ATI-7's Planning and Evaluation Officer I, Mr. Andrew M. Macaambac, who is also an organic agriculture advocate

Takna sa Agrikultura listeners receive farm implements

by JUN ALGUIN B. OLIVER

TAGBILARAN CITY – Sixty-eight “Takna sa Agrikultura” listeners received their farm implements given by the Agricultural Training Institute-Regional Training Center 7 after finishing the 10-day radio program initiated by the center.

The farm implements were given to the listeners so that they can perform the actual learnings that they have earned during the radio program and at the same time keep themselves busy especially during this time of pandemic, the COVID-19.

The 30-minute radio program anchored by the center’s farmcaster, Jun Oliver shared technical inputs on organic containerized gardening. The program aired on April 27 to May 11, 2020, over dyTR AM 1116 kHz, this city.

The listeners composed of clients from all walks of life claim their farm implements at the centers' training complex in Cabawan District, Tagbilaran City

Island City Mall, Alay Marcela Farms collabs with ATI-7

by DORIS ISABEL J. RACHO

Information Education and Communication (IEC) materials on High Value Crops are displayed for free distribution to passerby and shoppers of Island City Mall, Tagbilaran City. This effort is made as a collaborative effort between ATI-7 and Alay Marcela Foundation as an extension support during the pandemic

Tagbilaran City – it has been known that the threat of hunger is as real as the threat of COVID-19. The Department of Agriculture – Agricultural Training Institute (DA-ATI) in Central Visayas in collaboration with the Island City Mall (ICM) and Alay Marcela Foundation (AMF) - the corporate social responsibility arm of the Alturas Group of Companies (AGC) gave away technoguides, vegetables seeds as well as farm kits and set up IEC corner at ICM ground floor, Dao, this city.

Fourteen (14) assorted vegetable technoguides were produced by ATI-7 while AMF provided 6 varieties of seeds, fertilizers and farm tools to affected tenants and employees of the AGC and its customers.

The IEC corner at the mall was set up for the easy access of technology on vegetable production by walk –in clients.

The pandemic is seen to be long term as stated by the World Health Organization,

thus this mechanism was implemented so food availability will be ensured.

ATI-7 and AMF believes that with the provision of technoguides and seeds support, city dwellers can also grow their own food right at their backyard or any space available at home.

Likewise, this inspires affected tenants and employees while on enhanced community

embracing new normal on extension delivery

by MERRIAN PIQUERO SOLIVA, PHD

As I write this blog, I am already at my office desk. The work-from-home scheme was already up since our province is no longer on enhanced community quarantine; rather, it's on general beginning May 1 to 31, 2020 where agriculture, fisheries, and forestry sectors may resume full operations.

However, being in general community quarantine means that the movement of people is largely limited to "accessing necessities and work" while uniformed personnel and quarantine officers are present at border checkpoints.

With this, our planned activities from the last week of March until now are affected, thus, strategies were generated to run our extension and delivery services to our clientele in the region, particularly in Central Visayas.

Same with ATI's Network of regional training centers, we share similar challenges in the implementation of our programs, thus, the only solution that we found fitting is to maximize the use of social media.

Social Media is defined by lifewire dot com as web-based communication tools that enable people to interact with each other by sharing and consuming information.

Of course, for techie-inclined persons like that of the millennials or from generation y, this social media platform is as easy as peeling a banana, but for generation x like me, probably, it's a struggle or shall I say, some sort of a challenge so to speak.

When I think of this scenario, I can remember Obing, of ATI-10 and Hazel, of ATI-8, retorted my claim once that "I feel like I am ancient," especially if I don't have any first-hand idea on new trends presented when we have gatherings summoned by the Information Services Division headed by Ms. Niet Arceo.

Here, generation x and y are easily classified because we are like magnets in terms of informal groupings.

But what makes these two generations unique once convened in one work area is that the chemistry is understood that generated positive outcomes.

This blog is sincerely dedicated to both generations for making our Webinars and Social Media Cards on tips and technology guides plus other exciting online trivia and contests that generated a variety of positive comments and

On-remote planning with these millennials, Ma. Pamela N. Respecia, Technical Support Staff (upper right) and Rhea Kristene Q. Bongcac, Network Controller (below)

lauded by online learners and advocates as the best medium to reach them out.

These activities give me so many lessons in life that I can sum up into three important points: One, despite the pandemic, information Technology Bridges the gap and people are now embracing the new normal they are ready to implement what they have learned.

Two, both generations are a perfect mix because they played

L-R: Ma. Pamela N. Respecia, Technical Support Staff; Joemelyn Allianic-Sumagang, Training Specialist I together with Rhea Kristene Q. Bongcac, Network Controller and Licensed Agriculturist/Technical Support Staff, Jeffrey O. Awas during the brainstorming of the upcoming WEBINAR 01 on FAITH (Food Always in the Home) at the Information Services Section (ISS) Office of ATI-7

a great role in materializing the concept of reaching a wide variety of learners in the comforts of their home. Generation x is responsible for the content while generation y provides the aesthetic side that makes the output response the signs of time. Third, the openness of one's heart and mind to embrace and accept good practices from both generations plus the positive responses of the virtual participants that despite this crisis our extension delivery services are up and running and even to touch lives.

To my ATI Family across the network, my grand salute to all of us whom we never ceased to innovate just to put our clients' needs, as one of our top priorities. Our prayers that this crossroads will be akin to world healing.

Social Media is a web-based communication tool that enable people to interact with each other by sharing and consuming information

FITS Centers in Region 7 bridges information dissemination

by DORIS ISABEL J. RACHO

FITS Center of the Local Government Unit of Baclayon, Bohol receives assorted IEC materials from ATI-7 to supplement demands from client on production technology guides that could assist their gardening need during this time of pandemic

Central Visayas – COVID-19 has brought so much adversity - not just lives and economy but livelihood as well. Threat in food supply is foreseen as community quarantines and blockages in transport routes (especially that Region VII is composed of island provinces) restrict people's access to sufficient, diverse and nutritious sources of food unless measures are taken fast.

Seeing this and with the declaration of the enhanced community quarantine per province, the Agricultural Training Institute (ATI) – Regional Training Center VII promotes the services of the Farmers Information Technology Services (FITS) centers in the region. FITS centers serve as a one-stop shop that provides fast access to agricultural information and farming technologies.

please turn to **PAGE 13**

Island City Mall, Alay...

from PAGE 7

quarantine. Further, the IEC corner also provides information on the accessibility of free e-learning courses offered by the ATI. The ongoing IEC corner display started on March 27, 2020 and over 7,000 technoguide copies were distributed while more than 400 recipients availed of the seeds and farm kits from AMF.

Up for grab IEC materials prepared by the Information Services Section (ISS) of ATI-7 as support to the PLANT PLANT PLANT program of the Department of Agriculture to fight against the pandemic

Grow my own...

from PAGE 4

alongside with seeds, farm inputs, and farm business advisory services.

Meanwhile, Gov. Art Yap in his message: "In this time of the COVID pandemic, Bohol must be ready, not only to protect itself from disease, but must sustain living among us. People are hungry and without jobs.

A return to basics such as food production will ensure food security and basic income. At the very least, healthy living, exercise and nutritious food will be needed to strengthen our bodies to fight this virus. Join us in this program. It is our responsibility to make sure that no one goes hungry in Bohol today".

“ If you have a garden and a library, you have everything you need. ”
 ~Marcus Tullius Cicero~

FITS Centers...

from PAGE 11

In region 7 there are a total of 85 active FITS centers usually located where the City/Municipal and Provincial Agriculture Office (CAO/MAO/PAO) are.

Every FITS center was provided by ATI with necessary Information Communication Technology (ICT) equipment, as well as vegetables, crops and livestock technology production guides to give farmers and agriculture enthusiasts' easy access to information and technologies in farming.

In response to the COVID-19 crisis, these FITS Centers and MAOs/CAOs also provided seeds/seedlings to clients so food will be available at their homes and somehow help combat possible threat of hunger and be productive while on community quarantine.

As this developed, the City Government of Tagbilaran in collaboration with ATI-7 and Bohol Agriculture Promotion Center under the Department of Agriculture-7 distributed assorted vegetable seeds and information materials to the women's organization in the 15 barangays of the city. The partnership aims to promote urban gardening to mitigate the damaging effects of the COVID-19 outbreak.

FITS Center under LGU-Sagbayan, Bohol receives a variety of IEC materials on technology production guide for client distribution in support to their need in gardening during this COVID-19

18 Central Visayas' Learning Sites accredited in first semester

by MERRIAN PIQUERO SOLIVA, PHD

Joel Diccion of Calatrava Eco Farm receives his LSA Accreditation Certificate from ATI-7 Center Director, Dr. Carolyn May O. Daquio. In photos is (L-R) Dr. Gracia F. Arado, Training Superintendent I and PASS Chief, Lydia B. Borbano

TAGBILARAN CITY – The Agricultural Training Institute-Regional Training Center (ATI-7) based in Cabawan District, this city has a total of 18 Learning Sites approved in the region for the first semester (January-June) 2020.

Partnership and Accreditation Services Section (PASS) Chief, Lydia B. Borbano disclosed that 12 of these accredited learnings sites for agriculture (LSA) are from the province of Bohol namely: Mayor Lucas Asotigue Permaculture Learning Farm (Diversified Farm) of Triple Union, Catigbian, Bohol with Maria Luisa A. Ramirez as the Learning Site Cooperator; Labonite Family Farm of San Isidro, Pilar, Bohol with Jose G. Labonite; Ubay Stock Farm(Integrated Diversified Farm) of Purok 3, Lomangog, Ubay, Bohol with Joaquin P. Polistico; Jolit's Farm (Integrated-Diversified Farm) of Purok 1, Sitio Papan, Cambacay, Batuan, Bohol with Jomer M. Balag; Oikos Peace and Wellness Garden(Integrated-Diversified Farm) of Sitio Lagiwlwi, Zamora, Bilar, Bohol with Jose T. Traverro; Dagon sa Hohoyoy "Dagohoy" Farm of Babag, Dagohoy, Bohol with Marilou Meneses; Toting Farm of Causlan, Lagtangan, Sevilla, Bohol with Teopisto V. Cabagnet Jr.; Teofil's Garden
