## Verifying farm lot

For a successful Farmer and Farm Lot registration, users must measure farm lot by using Global Positioning System (GPS) device. Handheld GPS receiver is an essential tool to determine exact location and area of the farm lot to provide precise RCM recommendation.

# RICE CROP MANAGER (RCM)

# How does it work?

The platform calculates the **3Rs** in rice production:

- **R**ight amount/rate
- **R**ight type of fertilizer
- **R**ight timing of application

**Right.** Sample RCM recommendation generated after interview.

**Below.** Conceptual diagram for the operation and configuration of Rice Crop Manager.

# RECOMMENDATION

**RICE CROP MANAGER PHILIPPINES**

Reference ID: 3151218  
 Ngalan sa mag-uuma: Constantino Bayabado Taborada      Peta sa paglilim: June 9, 2023  
 Lokasyon: Nangka, Bayawan City (Tulong), Negros Oriental      Kondisyon sa lupa: Naay patubig, dili mogamit ug pump  
 Region VII      Paagi sa pagtanom: Mamanal nga pagtanom      Barangay: NSIC Riz14 (Tubagan 17)  
 Peta sa pagtanom: May 22, 2023

**\*Hinumduman: Gamiton kining rekomendasyon alang sa gitanom May 2023**

**🚫** Dili mag esprey ug insecticide hangtod 30 ka adlaw gikan pagtanom      **🌿** Mag-aplay ug zinc sa layungan. Mag sabwag ug 1 ka kilo nga zinc sulfate sa kada 40 ka kilo nga birhi hangtod 10 ka adlaw gikan pagpagod.

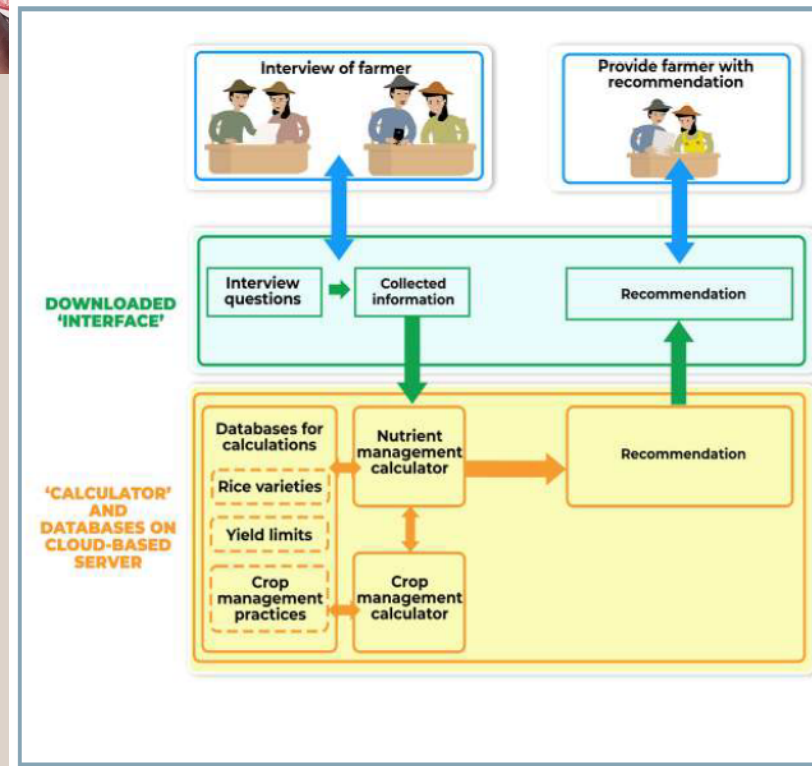

Ang target nga patubas pare sa 0.09ektarya ASalaw CTaborada basak ni asalaw inbred ang lupa 124 ka sako nga adunay 48 ka kilo kada sako 7.7 t/ha (kaugahon) 8.6 t/ha (Bag-o harvest)

Panahehan ug pagbulag/pagtungga (splitting) sa pagpangabun		Gidaghanon sa abuno alang sa 0.69 ektarya	
Listang sa Papatubo sang Humay	Adlaw gikan pagtanom (15-22 edad sa semilya)	1.4-1.14 with sulfur	Urea (46-0-0) MOP (0-0-60)
Bag-ong tubo	Basal-10	4 sako ug 7 kg	---
Pag panaha	17-21	---	1 sako ug 39 kg
Pag pangala	28-32	---	1 sako ug 44 kg    33 kg

## WHAR IS RCM?

Rice Crop Manager (RCM) is a web-based decision support tool giving personalized advice to farmers on crop and location-specific nutrient management for rice farming in the Philippines whose target users are Agricultural Extension Workers (AEWs), crop advisors, input providers, and farmer leaders who interview farmers. It stores the farmers' interview results gathered before the cropping season.

- 1 Open RCMAS homepage in the web browser and log-in using user credentials
- 2 Interview farmer online or offline
- 3 Transmit collected information online to "calculator" using web browser
- 4 Automatically receive "recommendation" online
- 5 Provide "recommendation" to farmer
