# Techno Guide on Organic Tomato Production

# **Production Management**

## **Plowing**

Plow the garden/plot.

## **Plot preparation**

The measurement of the plots is 1 meter width by 10 to 20 meters.

## **Digging Holes**

Dig holes with a depth of 15cm. distance between each plant is 50cm x 50cm.

## **Application of Organic fertilizer**

Apply organic fertilizer to each hole at rate of 1 kilo per hill.

## **Sowing of Tomato Seeds**

Grow the seeds in a seed box for 14 days.

## **Pricking and Transplanting**

After 14 days from sowing, prick the seedlings and transplant them into the plot/ garden.

## **Trellising**

After one (1) month from transplanting, support the tomato stem for straight growth with a one(1) foot bamboo stick.

## **Care and Management**

- Water the tomato plants everyday preferable early in the morning.
- Apply organic fertilizer every 15th day.
- Spray probiotics (organic pesticide) once a week.
