		Specs: With technology that enables a set of tires to last up to 100,000 km 1 Advanced Carbon-Based Tread Compound: A compound with higher carbon content provides increased resistance to road wear, thus helps improve tread wear performance. Optimized Wide Face Cavity: A larger tread width design, from an optimized cavity shape, puts more wearable rubber in contact with the road for a longer lasting tread. Maximized rubber volume provides more road contact area, and combined with a deep tread depth, allows for more wearable rubber. Reinforced for added protection and durability: Used in military grade equipment, is a lightweight material that maintains stiffness and strength even under high temperature conditions when the tire is in motion, giving driver's added protection against road hazards.
