## TERMS OF REFERENCE

### Procurement of Printing Services for the Reproduction of Digital Farmers Program (DFP) Modules

#### FOR ATI BIDDING CY 2023

## I. RATIONALE

The Digital Farmers Program (DFP) is the digital agriculture program of the ATI in partnership with PLDT and Smart, which intends to support the Sustainable Development Goals 1 (no poverty), 2 (zero hunger), 8 (decent work and economic growth), and 17 (partnerships for the goals), and improve the livelihood of Filipino farmers through digital technology.

As the Philippines moves towards the fourth industrial revolution and pushes for digital inclusivity, the ATI continues to redesign its initiatives to one that is more responsive to the changing needs of the sector. From the Institute's efforts on capacitating our stakeholders on mobile and internet literacy, as well as introducing them to various digital applications and platforms for farm productivity and livelihood, the DFP has expanded its services through four components.

One of which is the Farm Learn, the capacity building component of the DFP. This intends to help digital adoption of farmers and youth through learning courses on DFP 101 (basic mobile and internet literacy), DFP 102 (agriculture-related applications, social media marketing, and e-commerce), and DFP 103 (smart agriculture technologies) which are being implemented through the Institute's network of training centers, via face-to-face and online.

Since its launch in 2019, the DFP, through the ATI's Regional Training Centers, has trained around 5,000 farmers, youth, and other stakeholders. As the program continues to reach more farmers across the country and narrow the digital divide in the sector, the learning journey of its stakeholders are being supported through the provision of learning modules. These serve as references where stakeholders can rely on for information and have a better understanding of the topics under the DFP Farm Learn. Hence, the procurement of printing services for the reproduction of DFP Modules.
